16 October 2012

Recommendation: Mr. Barry Robertson and Aerowerks

To Whom It May Concern:

I am pleased to write this letter on behalf of Aerowerks. With over 40 years of experience as a food service contractor and consultant I have worked with Aerowerks and Aerowerks personnel for many years. We repeatedly choose them as they work as a design team, offering complete engineering assistance and design proposals, often coming up with unique ideas.

We have always been proud of both design and workmanship from them and it has been our pleasure to work with them through design to the finished product on several occasions. Our projects have always had their complete support including installation, follow-up and after-sales service.

Problems that have arisen on occasion, as they always do, were handled expediently and with total support for the end user.

We are currently working with their design team on three projects and one has a vertical conveyor due for installation in November of this year.

We have every confidence that this will be another successful project and look forward to working with Aerowerks in the future.

Sincerely  
Professional Foodservice Design, Inc.

A handwritten signature in cursive script that reads 'Stanley Schwartz'.

Stanley Schwartz, President
